We had our second faculty breakfast "Clinical Group Breakfast" this week. Richard Goldstein, MD led a discussion about Single Point Contracting and touched on many other relevant issues. Feedback from the group was very positive. Thank you for coming!

Our designer, Mary Lee O'Bryan will meet the FPB practice managers tomorrow and will then schedule meetings with each practice group to pick their fabrics and to assist with layout for their main waiting areas.

Happy New Year! As a faculty member for 30 years, I am proud of our plans to be the most comprehensive specialty and primary care center in Kentucky. We have the opportunity to provide unique services to our patients. Many of our niche procedures are at the cutting edge of medical science and are integral to our clinical research programs. Referring physicians appreciate our ability to provide world class expertise locally, and to participate in our ongoing continuing medical education efforts such as the U of L Mini Medical School. Our alumni greet our advances with enthusiasm and support. 2008 will be the year when everything comes together!

- Dick Wright, MD

The aluminum framing for the front and back entry glass wall is nearly complete and glass is being installed in the window openings. Brick and stone work is up to the 4th floor at the west wing. Interior work has started on several of the upper floors including drywall which has been installed on the 6th and 7th floors.

Please contact John Duncan for questions: (414) 277-0500.

Eye Specialists of Louisville, P.S.C. is the only ophthalmology group in metropolitan Louisville with physicians designated as the "Best Doctors in America". They offer state-of-the-art technology in every area of sub-specialization from pediatrics through adult. All physicians in the group have full-time faculty appointments at the University of Louisville. The group offers medical and surgical services in retina, uveitis, glaucoma, cataracts, cornea and external disease, pediatrics, adult strabismus, neuro-ophthalmology, oculofacial plastic & orbital surgery, and refractive surgery. Eye Specialists of Louisville currently maintains three office locations in the Kentucky Lions Eye Center on the downtown campus, Norton Medical Plaza off U.S. Hwy 22, and in the Central Station complex adjacent to the Paterson Baseball Field.

Many of the group’s physicians are internationally renowned experts in their respective fields. The group will open its new office on the first floor of the Faculty Office Building in conjunction with Vision First, a local optometric provider. Comprehensive ophthalmology and refractive surgery consultations will be offered at this new location.
