Recognize mutations associated with hereditary ca 6
Recognize hereditary ca syndromes 5
Recognize molecular biology of FAP
Recognize the appropriate management of stage 2 and 3 gastric cancer 4
Understand the characteristics of HNPCC 3
Understand the management of advanced gastric cancer 2
Understand the management of early stage adenocarcinoma of the esophagus 4
Understand the management of recurrent CRC 2
Recognize metastatic adrenocortical cancer 2
Understand the appropriate follow-up for colon cancer 3
Understand the chemotherapeutic treatment of CRC 4
Understand the management of esophageal cancer
Understand the management of well differentiated neuroendocrine carcinoma 4
Treatment of gastric cancer
Recognize benefits for trastuzumab in Her2+ gastric cancer 3
Evaluation of esophageal cancer
Management of advanced squamous cell cancer of the upper esophagus
Management of HCC 2
Management of metastatic GIST
Understand the management of anal cancer 2
Treatment of rectal cancer
Recognize Gilbert's syndrome
Understand the appropriate dx studies in planning colon cancer therapy
Understand the surgical management of hepatobiliary cancer
Management of metastatic GIST 2
