GU
Understand prognostic factors in RCC treatment 4
Understand the side effects of prostate cancer treatment 5
Understand the treatment of mediastinal germ cell tumors with mixed histology 2
Understand the treatment of pure seminoma 2
Manage residual RP masses after testicular cancer therapy 2
Management of muscle invasive bladder cancer 2
Understand poor risk features of RCC and proper treatment 4
Recognize the importance of accurate biopsy in bladder cancer 3
Understand endocrine therapy for prostate cancer 3
Management of small cell prostate cancer 2
Understand the management of testicular cancer
Understand the importance of PSA doubling time in prostate cancer 3
Recognize the ethnic and genetic risks of prostate cancer
Understand the management of nonseminomatous germ cell tumors 2
Understand the treatment of pure seminoma
Understand chemotherapeutic treatment of hormone refractory prostate cancer 2
Understand appropriate bone loss prevention in hormone therapy
Understand appropriate treatment for locally advanced bladder cancer

CNS
Recognize the proper treatment for patients with unmethylated MGMT 3
Recognize appropriate treatment for brain cancer 3
