Lung/ H and N

Recognize paraneoplastic sensory neuropathy
Recognize sx of primary head and neck cancer 4

Understand the biology of thyroid cancer
Understand the chemotherapeutic management of metastatic squamous cell carcinoma 2
Understand the indications for surgery to treat lung cancer 4
Understand the management of thymoma 5
Understand the staging of Hand N cancers 4
Understand the management of mesothelioma 4
Understand the dx of mesothelioma 2
Understand the use of adjuvant chemotherapy in NSCLC 2
Understand the surgical management of advanced laryngeal cancer 2

Recognize characteristics of non smokers lung cancer
Understand the use of molecular markers in well differentiated adenoca. 3
Recognized paraneoplastic hypercalcemia 2
Recognize paraneoplastic neuropathy
Understand the biology of thyroid cancer 3
Understand the dx and w/u of superior vena cava syndrome 2
Understand the incidence of secondary lung cancers 4
Management of recurrent laryngeal cancer
Understand treatment of laryngeal cancer
Management of advanced laryngeal cancer 2
Management of early stage thyroid cancer
Understand dx and w/u of SVC 3
Understand appropriate diagnosis in lung cancer
